

Anish Rana Magar

Berlin, Germany | ar8744477@gmail.com | github.com/anishranamagar | anishranamagar.github.io

Education

B.Sc. Computer Science

Gisma University of Applied Sciences

Oct 2022 – Present

Berlin, Germany

- Relevant modules: Algorithms & Data Structures, Design Patterns
- Focus subjects: Mathematics, Computer Science, English

Technical Skills

Languages Python, Java, C, SQL, HTML/CSS

Tools Git & GitHub, Linux/Bash, VS Code, IntelliJ IDEA, L^AT_EX/Overleaf, Jupyter Notebook, Docker (basics)

Concepts Data structures, OOP, software engineering principles, relational databases, unit testing, REST APIs, version control

Languages German (A2), English (C1), Nepali (Native)

Selected Projects

Student Grade Analyser

Python · pandas · Matplotlib

A command-line tool that reads student scores from a CSV file, computes descriptive statistics (mean, median, standard deviation), and generates grade-distribution histograms. Demonstrates clean function design, file I/O, and data visualisation. Source available on GitHub.

Library Management System

Java · OOP · JUnit

A console-based application implementing a library catalogue using OOP principles: inheritance, interfaces, and encapsulation. Features a custom singly-linked-list implementation and a JUnit 5 test suite covering edge cases. Achieved 90% code coverage.

University Database Schema

SQL · PostgreSQL · ER Design

Full relational database design for a fictional university system, including entity-relationship diagram, 3NF-normalised schema, and a set of SQL queries covering multi-table joins, aggregation, and correlated sub-queries. Fully documented with inline comments.

Work Experience

IT Support Assistant (part-time)

TechHilfe GmbH

Apr 2023 – Sep 2023

Berlin, Germany

- Provided first-level support for hardware and software issues
- Maintained internal documentation and knowledge-base articles
- Set up workstations and managed user accounts in Active Directory
